

Corrected simulations: Variable family lengths

OrthoHMM high sensitivity OrthoHMM satellite_v2

A Admitted datasets (out of 10)

Baseline	10	10	10	10
Divergence	10	9	5	5
Turnover	10	10	10	10
Divergence + turnover	10	8	10	10
20% missing	10	10	10	10
Uneven taxa	10	10	10	10
Taxon-count control	10	10	10	10
	OrthoHMM high sensitivity	OrthoHMM satellite_v2	OrthoFinder full	OrthoFinder checkpoint

B Paired F1 difference versus full OrthoFinder

Thick lines: nominal 95% CI. Thin lines: Bonferroni-14 CI. Bootstrap unit: independent simulation seed.

Comparisons condition on joint success; failed runs receive no imputed score. Panels are not pooled.

Ten seeds limit interval precision. The sequence checkpoint requires a valid full parent run.
